National Examination Board (Grade XI & XII) Pokhara, Nepal

Shree Amarsingh Model Secondary School Jul, 2019 - Jun, 2021

Bachelors of Computer Engineering Pokhara, Nepal

Gandaki College of Engineering and Science Mar, 2021 - Mar, 2026

PROJECTS

eMATADAN – Online Voting Application

Designed an online voting application which allows voters to register, manage candidates, vote securely, and generate results. It is developed using PHP, MySQL, HTML, CSS, and JavaScript.
https://github.com/subedi1680/eMATADAN

CHAUTARI – Community Interaction Portal

Designed a community website portal that facilitates interaction, discussion, and information sharing through multimedia posts. The application is built on React.js, Node.js, Express.js, and MongoDB.
https://github.com/subedi1680/CHAUTARI

JobBridge – Job Portal

Created a full-stack job portal for connecting employers and job seekers, complete with functionalities such as job posting, job search, and application management.
https://github.com/subedi1680/JobBridge

TRAINING/CERTIFICATIONS

10-day React JS Workshop by ITSNP 2025

ITSNP, Skill Shikhsya, YCA

- Built dynamic UIs using React components and JSX
- Managed data with props, state, and hooks
- Handled events and user input with forms
- Created mini-projects like a to-do list
- Learned best practices for clean, efficient code

Django Full Stack Course 2026

Code for Change Pokhara

- Developed backend structures by using Django models, views, and URL routing.
- Developed database schema and handled data through Django ORM.
- Implemented dynamic templating with HTML, CSS, and backend views.
- Implemented user authentication and login system.
- Created secured forms through form validation and CSRF protection.
